

# GLOBALMAX 1000

## Calcium Butyrate-Based Supplement for Poultry and Swine

PREMIXTURE OF ADDITIVES for laying hens, breeders, broilers, turkeys and other poultry and swine

### » PRODUCT DESCRIPTION

**Globalmax 1000** is a complex of coated calcium butyrate and calcium lactate in a unique carrier working synergistically to optimize the effects of butyric acid in poultry production, leading to improved health and performance.

**Globalmax 1000** is composed of (11.1.11) Calcium salts of organic acids (Calcium butyrate), (E327) Calcium lactate, (1m558i) Bentonite and carriers.

### » PRODUCT FORM

**Appearance:** Fine powder and/or granulate, Particle size: 0.3 – 1 mm

**Color:** White – grey color

### » INDICATIONS AND BENEFITS

- Stimulates differentiation and growth of intestinal wall (energy source for the villi)
- Helps to maintain the natural balance of the intestinal flora
- Positive effect on zootechnical and health performances (weight gain, FCR, laying rate...)
- Organic source of calcium
- Easy in mixing and utilization

### » RECOMMENDED APPLICATION

#### » Broilers:

Booster-Starter feed : 0.75 kg/ton

Grower and Finisher feed : 0.5 kg/ton

#### » Layers:

Pullet rearing : 0.5 – 1.0 kg/ton

Laying before 45 weeks : 0.5-1 kg/ton

Laying after 45 weeks : 1.0 kg/ton

#### » Breeders:

During all the production range: 1kg/ton

#### » Swine:

Sows : 1.0 – 2.0 kg/ton

Piglets : 1.0 – 2.0 kg/ton

Growing pigs and fattening pigs : 0.5 – 1.0 kg/ton

*For optimal dosage of the product, please contact our technical and analytical service team.*

### » PACKAGING

Plastic bags (polypropylene) of 25 kg.

### » SHELF LIFE AND STORAGE CONDITION

**Shelf life:** 24 months after production date when correct storage conditions are applied.

Store in original, closed package in a dry place at room temperature. Keep out of direct sunlight.

For manipulation, please refer to the MSDS.
