

B-TRAXIM 2C Fe – 220

Iron (II) chelate of glycine, hydrate

Code	M60-5000		
Description	Iron (II) chelate of glycine, hydrate in micro-crystalline particle size.		
Physical properties	B-TRAXIM 2C Fe - 220 appearance : grey to beige dustless free-flowing powder.		
Standard analysis	Iron	≥ 22%	
Legislation	In conformity with the European feed legislations: General Food Law (EC 178/2002), Feed Hygiene Regulation (EC 183/2005) and Feed Additive Regulation (1831/2003) and their amendments. In conformity in regard to undesirable substances (e.g. heavy metals and dioxins) according to EU directive 2002/32 and its amendments. Complies with EU regulation in regards to genetically modified organisms (EU regulations on GMOs: 1829/2003 and 1830/2003 and their amendments) and is not produced from ingredients from animal-derived substances.		
Stability	Maximum 60 months when stored in original packaging and kept in cool dry place. Possible variations in color are independent of its properties.		
Uses and benefits	The homogeneous particle size allows an optimum dispersion and insures a constant and regular level of metals in the ration.		
Application method	For animal nutrition, into feed via a premixture.		
Packaging	25 kg multi-layered paper and PE plastic bags.		
Application rates		EU Max (mg/kg)	mg/kg
	Swine piglet	250	1136
	Ruminants bovine	450	2045
	ovine	500	2273
	Poultry	450	2045
	Pets	600	2727
	Others	750	3409
	Fish and shrimp	750	3409
	Please take into consideration all mineral sources present and do check with local legislation.		
	<ul style="list-style-type: none"> • EU Max (mg/kg): maximum content of METAL mg/kg according to EU-regulation. • mg/kg: content of PRODUCT in mg/kg based on EU Max. 		
	Doses are displayed in complete feed with a moisture content of 12%.		
Safety	For safety information please refer to the product safety datasheet.
