

# GLOBALFIX PLUS

## Premium Technological Binding Agent for Animal Feeds

PREMIXTURE OF ADDITIVES for animal feed production

### »» PRODUCT DESCRIPTION

**Globalfix Plus** is a synergistic triple-component mycotoxin-binding complex.

**Globalfix Plus** is composed of: (7.13.1) Vegetable charcoal, (12.1.12) Yeast products (yeast cell wall; *Saccharomyces cerevisiae*) and (1m558i) Bentonite.

### »» PRODUCT FORM

**Appearance:** free flowing powder with high absorbent capacity

**Color:** Grey

### »» INDICATIONS AND BENEFITS

- **Intestinal protection:**  
Globalfix Plus reinforces the strength of the intestinal wall, closing the tight junctions and exerting intestinal anti-inflammatory properties that help block in-vivo mycotoxin penetration.
- **Immuno-stimulation:**  
Thanks to its  $\beta$ -glucan rich yeast cell wall content, Globalfix Plus helps enhance immuo-stimulation and consequently limits immune-suppressive effect of mycotoxin toxicity.

### »» RECOMMENDED APPLICATION

1.0 – 3.0 kg of complete feed

ZEA > 500 ppb: 1.0 kg/t

DON > 2500 ppb: 2.0 – 3.0 kg/t

*For optimal dosage of the product, please contact our technical and analytical service team.*

### »» PACKAGING

Plastic bags (propylene) of 25 kg

### »» SHELF LIFE AND STORAGE CONDITION

**Shelf life:** 24 months after production date when correct storage conditions are applied.

Store in original, closed package in a dry place at room temperature. Keep out of direct sunlight.

For manipulation, please refer to the MSDS.
