

ALPHASELEN

Liquid feed supplement

Vitamin E + Selenium

ALPHASELEN contains vitamin E, an antioxidant which helps to protect biological membranes. Like the Selenium, it plays a role in the protection of cellular membranes.

ALPHASELEN is particularly recommended in the critical growth phases to fight against muscular dystrophy. It brings Vitamin E and Selenium to ensure the good functioning of muscular, vascular and nervous functions.

For poultry, ALPHASELEN also improves growth and feathering of broilers and laying hens. It is particularly recommended to fight against encephalomalacia, muscular dystrophy, exudative diathesis and infertility.

COMPOSITION:

Demineralized water
13.11.1 Propylene glycol
13.5.5 Glycerin

Additives per litre :

3a700 Vitamin E : 100 000 mg
E8 Selenium : 450 000 mg
E484 Glycerol olyethylene-glycol nicinoleate : 130 000 mg
E330 Citric acid : 4 000 mg

Analytical constituents :

Humidity :	85 %
Crude protein	0.3 %
Crude fat	3.3 %
Crude cellulose	0.1 %
Crude ash	0.01 %
Calcium	< 0.001 %
Phosphorus	< 0.002 %
Sodium	0.003 %

Dairy cows : 20 ml per head or 200 ml per 1000 litres of drinking water during 30 days.

Suckler and dry cows : 15 ml per head or 150 ml per 1000 litres of drinking water, 15 days a month.

Young bovines, heifers, bull-calves : 10 ml per head or 100 ml per 1000 litres of drinking water, 15 days a month.

Broutards and calves : 4 ml per head or 40 ml per 1000 litres of drinking water, 15 days a month.

Poultry : 400 ml per 1000 litres of drinking water for a week.

Dairy goats :

2 ml per head or 200 ml per 1000 litres of drinking water, during 30 days.

Dairy goats :

2 ml per head or 200 ml per 1000 litres of drinking water during 30 days.

Sows : 150 ml per 1000 litres of drinkign water during 10 to 15 days, 3 weeks before artificial insemination or farrowing.

CONTAINERS from 1 to 20 L
