

## PAN-THYM 400

Thyme, herbaceous and spicy type  
Universal flavouring for all types of feed

<i>Code</i>	6400
<i>Description</i>	Flavouring premixture. Enhances the taste of the feeds and imparts to them an attractive and persistent aroma of thyme, with a herbaceous and spicy undertone.
<i>Appearance</i>	Free flowing whitish to pale yellow powder, dustfree.
<i>Composition</i>	Natural and nature identical flavouring substances.
<i>Physical properties</i>	Bulk density : 0.62 - 0.80 g/cm <sup>3</sup> Granulation : 80 - 400 microns
<i>Legislation</i>	In conformity with European and American feed legislations. Free from GMO and animal products. In conformity with the directive (2002/32/CE) and its modifications. Contains: Propylene glycol E 490 (60 g/Kg)
<i>Stability</i>	Maximum 18 months when stored in original packaging and kept in a cool dry place. Variations in colour are independent of its aromatic properties.
<i>Use and Benefits</i>	All types of feed. PAN-THYM 400 confers to the feeds a spicy taste and improves their palatability. It ensures a regular consumption when variation of raw materials quality or change in formulation occur, and reduces waste. It corrects the taste of unpalatable raw materials (alfalfa, minerals). The attractive and persistent smell of thyme emitted by the feed adds a marketing impact to the manufacturer and is highly appreciated by the farmer.
<i>Application method</i>	Mixing into feed.
<i>Packaging</i>	25 kg multi-layered paper and plastic bags. PA/EVOH/PE plastic bags, recycling category 07.
<i>Application rates</i>	All types of feed 150 - 250 g/t Please note that application rates quoted above are very much dependent upon the raw materials used in the feed formulation. For specific recommendations on the products intended to be used, please contact the local Pancosma representative for further information.
